

Scaffolding and Access

Setting the Standard in
Safe Access.

DYSIN LTD

Scaffolding & Access Solutions

Introduction

Supporting industrial businesses with safe scaffolding and access solutions that minimise downtime and maximise productivity.

Dysin Ltd supports industrial, energy from waste and commercial clients with dependable scaffolding and access solutions for planned maintenance, shutdowns, capital projects and emergency works. Our experienced teams understand the demands of live operational environments, delivering safe access with minimal disruption and maximum efficiency.

Our flexible call on, call off service gives clients immediate access to experienced scaffold teams without the cost of maintaining a permanent on site workforce. Working alongside engineering and maintenance teams, we respond quickly to keep projects on schedule, minimise downtime and maintain operational continuity.

As a proud NASC accredited contractor, supported by SafeContractor and SMAS WorkSafe accreditations, safety, quality and compliance are at the heart of everything we do. Combined with experienced operatives, modern equipment and a customer first approach, we deliver dependable access solutions that clients can rely on, project after project.

Why Choose Dysin

We combine technical expertise, flexible service and rapid response to deliver safe, dependable scaffolding and access solutions that minimise downtime and support your operations.

We understand the pressures of live industrial environments, where safety, efficiency and reliability are critical. That's why our service is built around providing responsive support, experienced operatives and practical access solutions that keep your projects moving from start to finish.

Industrial Expertise

Over 15 years' experience working on energy from waste facilities and other industrial sites. We understand the challenges of live environments and deliver solutions that keep operations safe and efficient.

Flexible Service

Scale support up or down as your operational requirements change. Our call on, call off approach provides experienced scaffold teams exactly when you need them, without the cost of maintaining a permanent on site workforce.

Rapid Response

Fast mobilisation when you need it most. Our experienced teams respond quickly to planned and reactive requirements, helping minimise downtime and keep critical operations moving.

Safety and Compliance

Safety is at the heart of everything we do. As a NASC accredited contractor, supported by ISO certifications, SafeContractor and SMAS WorkSafe accreditations, we deliver dependable access solutions to the highest standards of safety, quality and compliance.

Accreditations & Compliance

Safety, quality and compliance underpin every project we undertake. Our nationally recognised accreditations and internationally recognised management systems demonstrate our commitment to delivering safe, reliable scaffolding and access solutions across industrial, commercial and energy from waste environments.

Industry Accreditations

NATIONAL ACCESS & SCAFFOLDING
CONFEDERATION

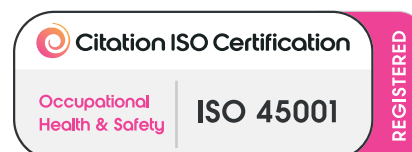

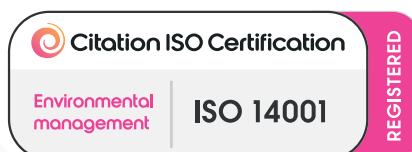

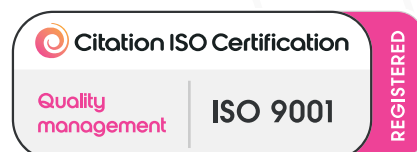

Our industry accreditations provide independent assurance that our working practices, health and safety procedures, training programmes and operational controls meet the rigorous standards expected across the scaffolding and construction industries.

[Learn more about our NASC accreditation on the following page](#)

ISO Management Systems

Dysin Ltd maintains ISO certification through Citation, demonstrating our commitment to continual improvement across every aspect of our business.

These internationally recognised standards support the way we plan, manage and deliver every project.

We are a NASC Accredited Contractor

At Dysin Ltd, safety, quality and professionalism are at the heart of everything we do. We are proud to be a NASC Accredited Contractor, demonstrating our commitment to the highest standards within the scaffolding industry.

NASC (National Access & Scaffolding Confederation) membership is recognised as the industry benchmark for excellence. Accreditation is only awarded to contractors who meet rigorous standards for health and safety, technical competence, training and operational management.

By choosing Dysin Ltd, you can be confident that your project will benefit from:

Fully trained and competent scaffolders

Our teams are highly trained, experienced and assessed to NASC standards.

Strict compliance with current health and safety legislation

We work in full compliance with all relevant legislation and industry requirements.

High quality scaffolding designed and erected to industry best practice

All scaffolding is designed, installed and maintained to the highest standards of safety and quality.

Regular independent audits and continuous improvement

We are independently audited to ensure we continually meet and exceed NASC requirements.

A commitment to delivering safe, reliable access solutions

We are committed to providing safe, reliable and professional scaffolding and access solutions.

Whether working on residential, commercial or industrial projects, our NASC accreditation reflects our dedication to providing safe, compliant and dependable scaffolding services every time.

NASC accreditation.
Setting the standard in scaffolding.

Developing Future Talent

Investing in the next generation of scaffolders.

Dysin Ltd employs scaffolding apprentices, providing opportunities to gain valuable practical experience on live industrial projects. While formal training and qualifications are delivered by approved external training providers, our experienced teams support apprentices with hands on learning, helping them develop the confidence, skills and experience needed for a successful career in the industry.

Practical Site Experience

Working alongside experienced operatives on live industrial projects to build practical skills and confidence.

Supported Learning

Developing knowledge through day to day mentoring, real project experience and guidance from experienced professionals.

Building Careers

Creating long term opportunities by helping apprentices develop the skills, experience and attitude needed for a successful career in scaffolding.

Building the workforce of tomorrow.

Health & Safety

At Dysin Ltd, safety is more than a policy, it's part of our culture.

Every project begins with a commitment to safe planning, responsible working practices and looking after one another. By combining training, communication and continuous improvement, we create safer workplaces for our people, our clients and the communities in which we work.

**Work Safe,
Home Safe.**

Building a Strong Safety Culture

Our commitment to safety is reflected in the way we train, support and empower every member of our team.

Safety Culture

We promote a culture where safety is everyone's responsibility, giving every employee the confidence to identify risks, speak up and make safe decisions every day.

Training

Regular training, competency assessments and professional development ensure our teams have the knowledge and skills to work safely across every project.

Toolbox Talks

Frequent toolbox talks encourage open discussion, shared learning and continuous improvement, keeping safety at the forefront of every task.

Safety Starts Before Work Begins

Safe projects are built through careful planning, clear communication and the commitment of every member of the team to doing the job properly, every time.

Specialist Safety

Protecting our workforce through specialist equipment, ongoing training and robust safe systems of work.

Working in high risk industrial environments demands specialist knowledge, equipment and planning. Our experienced teams are trained to work safely at height, within confined spaces and in challenging operational environments while maintaining the highest standards of compliance.

Fall Arrest Equipment

Certified fall arrest systems, including harnesses, lanyards and anchor points, are used wherever required. All equipment is routinely inspected, maintained and used in accordance with current legislation and manufacturer guidance.

Respiratory Protective Equipment (RPE)

Where airborne hazards are present, suitable respiratory protection is selected, face fit tested and supported by ongoing training to ensure our workforce remains protected.

Confined Space Scaffolding Safety

Every confined space activity is carefully planned and risk assessed before work begins. Gas monitoring, ventilation, rescue planning and competent supervision ensure work is completed safely from start to finish.

Safety in Practice

Emergency Planning

Regular emergency response exercises help ensure our teams are ready to respond safely and effectively across a wide range of site scenarios.

Continuous Improvement

Following every project, we review our performance, identify opportunities for improvement and apply lessons learned to future work.

Performance at a Glance

Our Safety Record	2023	2024	2025
Fatal accidents	0	0	0
Specified injuries	0	0	0
Lost time injuries	0	0	0
Falls from height	0	0	0
Prohibition notices resulting in prosecution	0	0	0

Safety Equipment & PPE

Every project requires the correct equipment for the task.

Dysin provides operatives with appropriate PPE and RPE to help protect against workplace hazards and support safe working practices across industrial, commercial and confined space environments.

Disposable RPE Mask

3M Aura 9332+

- ✓ Protects against airborne dust and particulates
- ✓ Lightweight and comfortable for extended wear
- ✓ Suitable for confined spaces
- ✓ Certified to relevant EN standards

Powered Air Respirator

3M Versaflo

- ✓ High level respiratory protection
- ✓ Suitable for confined space operations
- ✓ Reduced breathing resistance
- ✓ Compatible with other site PPE

Reinforced Grip Gloves

Showa 330

- ✓ Excellent grip in wet and dry conditions
- ✓ Abrasion resistant coating
- ✓ Flexible for prolonged use
- ✓ Certified to EN 388

Full Body Harness & Lanyard

SpanSet

- ✓ Adjustable ergonomic design
- ✓ Suitable for work at height
- ✓ Durable webbing and steel fittings
- ✓ Used as part of our fall arrest systems

**PPE forms one part of
Dysin's wider safety
management system.**

Equipment is selected alongside risk assessments, safe systems of work and ongoing training to ensure every operative is properly protected for the task.

Access Capabilities & Additional Services

Specialist access solutions delivered by experienced teams across industrial, energy from waste and commercial environments.

From conventional scaffolding through to confined space rescue support, Dysin provides a complete range of access services tailored to the demands of each project.

Access Capabilities

Conventional scaffolding access

Internal & confined space scaffolding

Mowp access solutions

Rope access solutions

Design & bespoke scaffold solutions

Edge protection & safety barriers

System stair towers & system scaffolding

Weekly scaffolding inspections

Confined space rescue services

Hole & fire watch services

Additional Services

High risk confined space rescue & planning

Thermal insulation removal, fitting & fabrication

Continuous Improvement

Every project gives us the opportunity to review, refine and improve.

We challenge the brief, rethink the approach and deliver better solutions.

2025

Original Solution

Conventional tube scaffolding

Review

We reviewed the project to identify challenges and opportunities.

Redesign

Our team designed a system scaffold solution to improve access and efficiency.

Improved solution

A safer, faster and more efficient outcome delivered for the 2025 shutdown.

2026

Improved Solution

System scaffold redesign

Case Study:

Improving Access Through System Scaffolding

These images show the same energy from waste furnace across two consecutive maintenance shutdowns.

2025

The client requested conventional tube and fitting scaffolding. Following a review of the project, Dysin redesigned the access solution using system scaffolding for the 2025 shutdown.

2026

The new design provided improved access for maintenance teams while making the removal of grit blasting materials quicker, safer and more efficient.

Scaffolding Design & Engineering

Every scaffold solution begins with careful planning and engineering.

Our in-house design capability ensures every structure is developed to meet project requirements, current industry standards and site specific conditions. From simple access scaffolds to complex temporary works, our design process provides confidence that every solution is safe, compliant and fit for purpose before installation begins.

Scaffold Design

Engineered solutions tailored to the specific requirements of each project.

3D Digital Modelling

Advanced 3D modelling provides a detailed and immersive view of the design before installation.

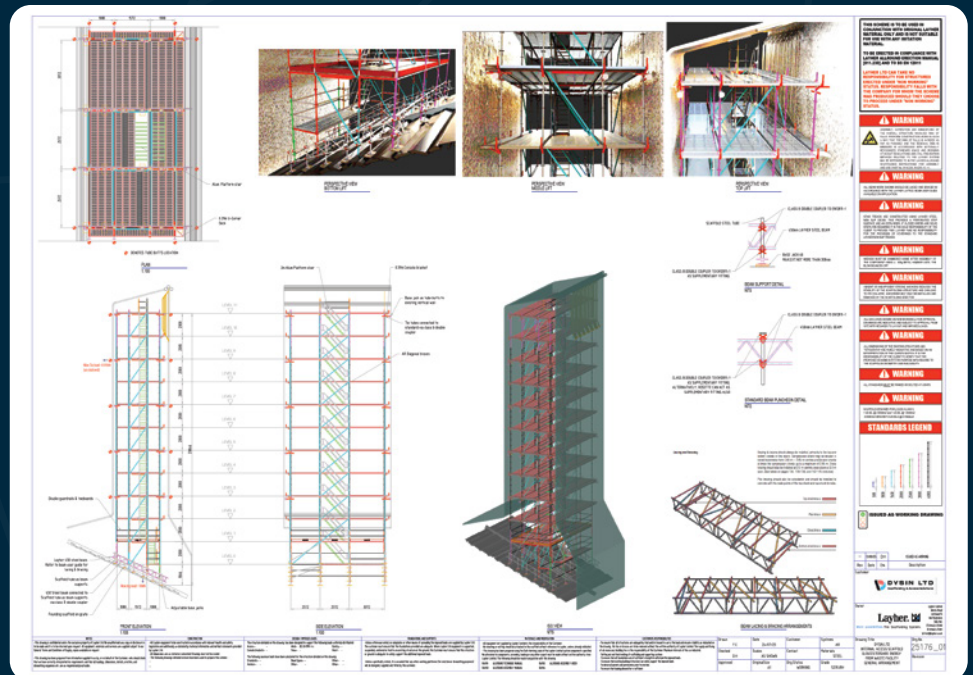

Engineered for Compliance

All designs are produced in line with current standards, guidance and project requirements.

Design Capabilities

- ✓ Project specific scaffolding designs
- ✓ Detailed technical drawings
- ✓ Advanced 3D digital modelling
- ✓ Safe, compliant engineering solutions

An example of our system scaffolding design, incorporating advanced 3D digital modelling to provide a more detailed and immersive visualisation before installation.

Who We Work With

Trusted by leading organisations across industrial, energy from waste, steel manufacturing and environmental services.

Supporting some of the UK's leading organisations with specialist scaffolding, confined space and access solutions for maintenance, shutdowns and capital projects.

Supporting Our Community

We believe in supporting the communities where we live and work, creating opportunities that have a lasting impact.

At Dysin Ltd, we proudly support local initiatives, grassroots sport and community organisations across the Midlands. We're equally committed to developing the next generation through apprenticeships and training, helping bring new talent, enthusiasm and long term skills into the industry.

Proud **Aston Villa Foundation** Community Partner

As an Aston Villa Foundation Community Partner, we are proud to support programmes that use the power of sport to inspire young people and strengthen local communities.

Alongside our Aston Villa Foundation partnership, we proudly support grassroots football clubs across the Midlands, helping create opportunities for young people both on and off the pitch.

Supporting Local Sport

Backing local clubs and youth teams.

Community Partnerships

Working with organisations that make a difference.

Developing Future Talent

Creating opportunities through apprenticeships.

Positive Impact

Investing in people, communities and the future.

Industrial Insulation Services

Improving energy efficiency, protecting critical assets and supporting safe industrial maintenance.

Dysin Insulation Services provides specialist industrial insulation solutions across energy from waste, manufacturing and heavy industrial environments. Our experienced teams deliver insulation installation, maintenance and removal services that improve operational efficiency while protecting equipment and personnel.

Working alongside our access division, we provide integrated scaffolding and insulation solutions that minimise downtime and simplify project delivery.

Thermal Insulation

Specialist insulation systems designed to reduce heat loss, improve energy efficiency and protect plant and process equipment across industrial facilities.

Insulation Installation & Maintenance

Installation, replacement and maintenance of insulation systems during planned shutdowns, outages and routine maintenance programmes.

Protective Cladding & Finishes

Aluminium and stainless steel cladding systems that protect insulation, improve durability and provide a professional finished installation.

Integrated Access & Insulation

By combining scaffolding and insulation services under one roof, Dysin provides a coordinated solution that improves safety, reduces downtime and delivers greater efficiency across every project.

- ✓ Thermal insulation installation
- ✓ Insulation removal & replacement
- ✓ Aluminium & stainless steel cladding
- ✓ Pipework & vessel insulation
- ✓ Shutdown & outage support
- ✓ Preventative maintenance
- ✓ Integrated access & insulation
- ✓ Industrial maintenance projects

Get in Touch

Let's discuss your next project.

Whether you're planning a shutdown, specialist scaffolding project, confined space works or industrial insulation installation, our experienced team is ready to help.

Contact Dysin today to discuss your requirements and discover how we can support your project safely, efficiently and on schedule.
